

PROFESSIONAL EXPLORATION SERVICES

THAT KEEP YOUR PROJECTS MOVING

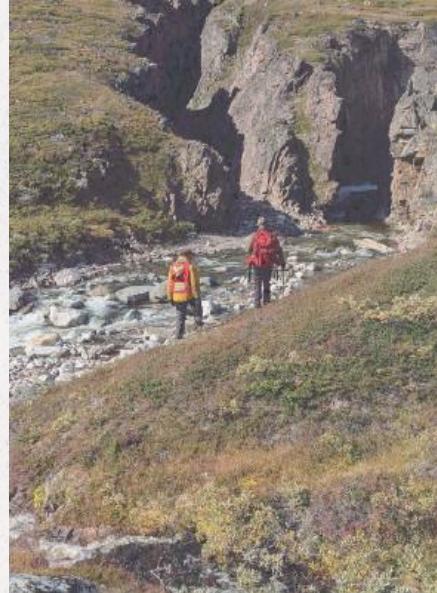

EXPLORATION SERVICES

Operating in Greenland's challenging and isolated landscapes demands reliability, resilience, and deep local understanding. Our team delivers fully integrated exploration camp and logistics solutions designed to keep remote operations running smoothly, safely, and efficiently. From field-ready staffing and camp services to end-to-end freight solutions, we provide the expertise required to sustain projects in even the most inaccessible parts of Greenland.

Exploration Camps

Comprehensive end to end camp solutions designed for remote expeditions, delivering safe, comfortable, and fully equipped living environments in challenging locations.

Staffing

Skilled, reliable personnel to support all aspects of operations, from camp setup and maintenance to specialist roles tailored to your project needs.

Catering

High quality, nutritious meal services crafted for remote field teams—ensuring energy, satisfaction, and consistent food safety standards.

Site management

Professional on site oversight to keep daily operations running smoothly, efficiently, and safely, with a focus on logistics, compliance, and operational excellence.

Medical

Dedicated medical support for field operations, providing emergency response, first aid, and ongoing health services to ensure team wellbeing in remote environments.

FIELD Safety & Security

Comprehensive protection and risk management services designed for remote and demanding environments.

LOGISTICS

Freight forwarding & distribution

Efficient movement of cargo across Greenland's challenging Arctic, ensuring your exploration equipment and supplies arrive safely and on time—no matter how remote the destination.

Custom clearance

Streamlined customs handling tailored to Greenlandic regulations, enabling fast, compliant import and export of scientific gear, field equipment, and expedition supplies.

Transfers & accommodation

Coordinated travel and lodging solutions for exploration teams, including reliable transfers between airports, ports, and field locations, plus trusted accommodation arrangements in key Greenlandic hubs.

Warehouse

Secure warehouse facilities strategically located for Arctic operations, providing storage, inventory handling, and staging space for expedition cargo and field supplies.
